Application/Control Number: 10/003,012

Art Unit: 2829

1. Applicant's election without traverse of species of figure 4 in Paper No. 7 is acknowledged.

- Claims 6-9,13-22,24-26 are drawn from further consideration pursuant to 37 CFR
 1.142(b) as being drawn to a nonelected species being no allowable generic or linking claim.
 Election was made without traverse in Paper No. 7.
- 3. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.
- 4. Claims 4 and 11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 4 and 11, it is unclear what "a temperature sensor" represents. Is it shown in any of drawings?

5. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the feature of "a temperature sensor" as recited in claims 4 and 11 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Application/Control Number: 10/003,012

Art Unit: 2829

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 7. Claims 1-3 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Carlin et al (Pat # 5,124,639).

As to claims 1,3 and 10, Carlin et al disclose in figure 5 a probe apparatus having a probe card (50) for testing a die (24) and a heating element (48) located adjacent to the probe card at a portion of the probe card (probe ring "40"). Carlin et al do not mention about the energy transmissive element to selectively control geometric planarity of the probe card. However, according to Carlin et al the heating element (48) is used for heating probe leads (22) in order to reduce probe lead shifting or drift. Therefore, it would have been obvious for one of ordinary skill in the art to recognize that the heating elements (48) would be qualified as the energy transmissive element since it utilizes transmitted energy to selectively control geometric planarity of the probe card.

As to claim 2, it appears that the energy transmissive element (48) is located generally along a perimeter of the probe card.

8. Claims 5,12 and 23 rejected under 35 U.S.C. 103(a) as being unpatentable over Carlin et al (Pat # as applied to claims above, and further in view of admitted prior art figure 3.

As to claims 5,12 and 23, Carlin et al do not disclose a probe card with a stiffener. However,

Application/Control Number: 10/003,012

Art Unit: 2829

Page 4

admitted prior art figure 3 teaches that it would have been well known to provide a stiffener

(360) for securing the probe card in place. It would have been obvious for one of ordinary skill in

the art to provide a stiffener as taught by admitted prior art figure 3 to the device

of Carlin et al so that the probe card is secured properly during test.

9. The prior art made of record and not relied upon is considered pertinent to applicant's

disclosure.

Geldermans (pat # 3,963,985) discloses probe device having probe heads and method of

adjusting distance between probe heads.

10. Any inquiry concerning this communication or earlier communications from the examiner

should be directed to VINH P. NGUYEN whose telephone number is (703) 305-4914.

Any inquiry of a general nature or relating to the status of this application or proceeding should

be directed to the Group receptionist whose telephone number is (703) 305-4900.
